## Final Cut Pro 5 SET-UP with Tascam FW-1082

Make sure you fire wire light is lit on the FW-1082  
You must install the 1.5 drivers or later  
There is also a folder to update the firmware, please follow the instructions and update the driver.

Restart the Macintosh and the FW-1082

Press control panel button on the 1082.  
Check to see that the midi light is green  
The unit revision history is the same (Like BELOW)  
Also control protocol should set to MACKIE CONTROL EMULATION

## **Start FCP 5**

Go to Tools and Select **Controls Surface**

Click on the plus sign

Select the FW-1082 control port for input and output.

Click OK

Inside FCP 5 select Tools and then **Audio Mixer**

You can hide the audio mixer if it gets in the way.

Now you should have Surface control from your FW-1082.

Have Fun!
